Enterprise ERP · Admin Guide

Company Owner vs Company Admin

Dono mein kya farq hai, kis ke paas kya taqat hai, aur kab kise kya role dena chahiye — asaan Hinglish mein.

Version 1.0 · 16 October 2026

1. Ek nazar mein

Company ke andar do sabse bari taqat wale roles hain: **Company Owner** aur **Company Admin**. Asaan alfaaz mein — **Owner maalik hai, Admin uska manager**. Admin rozana ka saara kaam sambhal leta hai, lekin aakhri faisle aur sabse sensitive kaam sirf Owner ke haath mein rehte hain.

Company Owner

Dukaan ka maalik · demo: `owner@northwind.test`

- Company ke andar **100% access**
- Uska role **locked** hai — koi uski taqat kam nahi kar sakta
- Payroll ka aakhri approval aur payment
- Sirf Owner hi kisi ko Owner bana ya hata sakta hai

Company Admin

Dukaan ka manager · demo: `admin@northwind.test`

- Rozana ka sab kaam: HR, accounts, sales, stock, users
- Staff ko invite karna aur roles dena
- **Payroll chala nahi sakta** (sirf setup)
- Owner ko chhed nahi sakta, apni taqat barha nahi sakta

Yaad rakhne ka asool

Admin **sab kuch kar sakta hai** — siwaye do cheezon ke: (1) **paisa nikalne wala payroll ka aakhri qadam**, aur (2) **Owner ki kursi ko chhedna**.

Login accounts (testing ke liye)

#	Role	Email	Access
1	👑 **Platform Owner**	`platform@erp.test`	Saari companies banana, band karna aur unke owner muqarrar karna (company ka andar ka data nahi dekhta)
2	🏢 **Company Owner**	`owner@northwind.test`	Apni company mein **100% access**, sab kuch
3	🛡️ **Company Admin**	`admin@northwind.test`	Owner jaisa, magar payroll final nahi kar sakta aur kisi ko Owner nahi bana sakta

Teeno ka password: `password` · Login: `http://localhost:3000` · **Ye sirf demo/testing accounts hain** — asli istemal mein apne email aur strong password istemal karein.

2. Poora farq — ek table mein

Kaam	🏢 Owner	🛡️ Admin
HR, Accounts, Sales, Stock, Projects, Reports — sab modules	✓	✓
Company settings, branches, departments	✓	✓
Staff invite karna (HR, Accountant, Employee…)	✓	✓
Payroll setup dekhna aur badalna (salary structure, tax table)	✓	✓
Payroll chalana — calculate, approve, finalize, pay	✓	✗
Kisi ko Owner banana	✓	✗
Owner ko deactivate karna ya company se hatana	✓	✗
Apne hi role ki permissions badalna (apni taqat barhana)	✓	✗
Woh permission kisi ko dena jo khud ke paas nahi	✓	✗
Owner ke role ko badalna ya delete karna	✗ (locked)	✗

Peeli lines woh kaam hain jo **sirf Owner** kar sakta hai.

3. Admin ko ye cheezein kyun nahi di gayin?

① Payroll chalana

Salaries company ka sabse sensitive kaam hai — is mein **asal paisa bank se nikalta hai**. Is liye system mein payroll ke 5 qadam hain: *Draft → Calculated → Approved → Finalized → Paid*. Admin salary structure aur tax table tayyar kar sakta hai, lekin **calculate, approve, finalize aur pay** ki ijazat sirf Owner (aur jis ko Owner khud `payroll.process` permission de, jaise HR Manager) ke paas hai.

> 🔒 **Maker–checker**
> Jo shakhs payroll run **banata** hai, wo use khud **approve nahi** kar sakta — doosra banda approve karega. Is se ghalti ya dhoka pakda jata hai.

② Owner banana ya hatana

Agar Admin khud ko ya kisi aur ko Owner bana sakta, ya asli Owner ko company se nikal sakta — to wo **poori company par qabza** kar leta. Isliye ye kaam sirf Owner kar sakta hai. Agar Admin koshish kare to server **403 — access denied** ka jawab deta hai, chahe wo button chhupa ho ya koi seedha URL bhi bheje.

③ Apni taqat khud barhana

Admin **apne hi role** (Company Administrator) mein nayi permissions nahi daal sakta, aur kisi ko aisi permission nahi de sakta jo **uske apne paas na ho**. Asool simple hai: **"Jo tumhare paas nahi, wo tum kisi ko de bhi nahi sakte."** Sirf Owner is pabandi se azad hai.

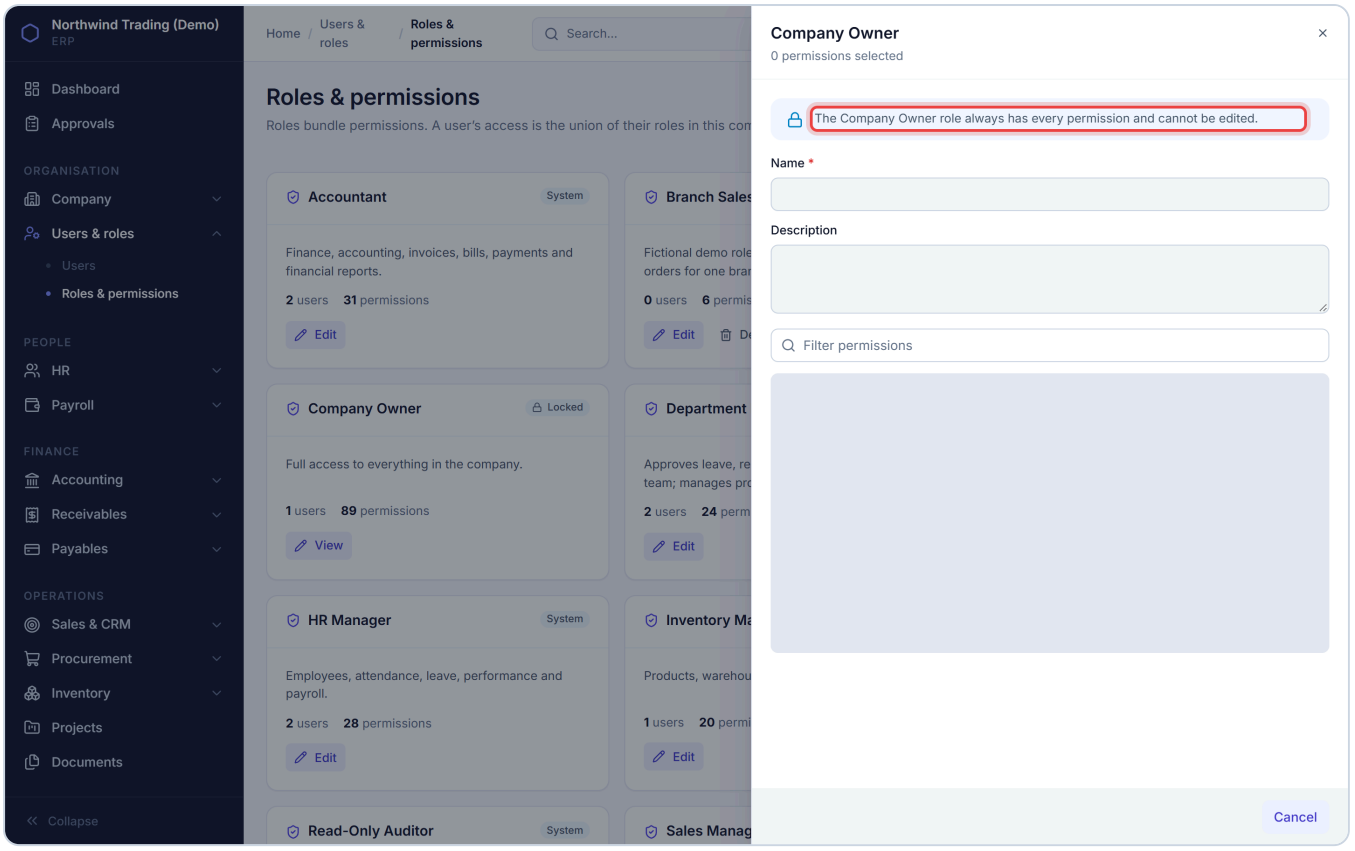

Figure 1 — Roles & permissions page: **Company Owner** role par "Locked" likha hai. Is role ko koi edit ya delete nahi kar sakta.

4. Owner, Admin kaise banata hai

1. Owner login karta hai → **2.** Users & roles → Users → **Invite user** → **3.** Naam, email, role: **Company Administrator** → **4.** Gmail par invitation → wo apna password banata hai

1. Owner ke account se login karein.
2. Sidebar mein **Users & roles** → **Users** par jayein aur upar right **Invite user** dabayein.
3. **Full name** aur **Work email** likhein.
4. **Roles** mein **Company Administrator** par tick lagayein.
5. Sab branches ki access deni hai to **Access to all branches** on rehne dein; warna off karke sirf zaroori branch chunein.
6. **Send invitation** dabayein. Us shakhs ko Gmail par link jayega — wo **apna password khud** banayega. Owner ko uska password kabhi pata nahi chalta.

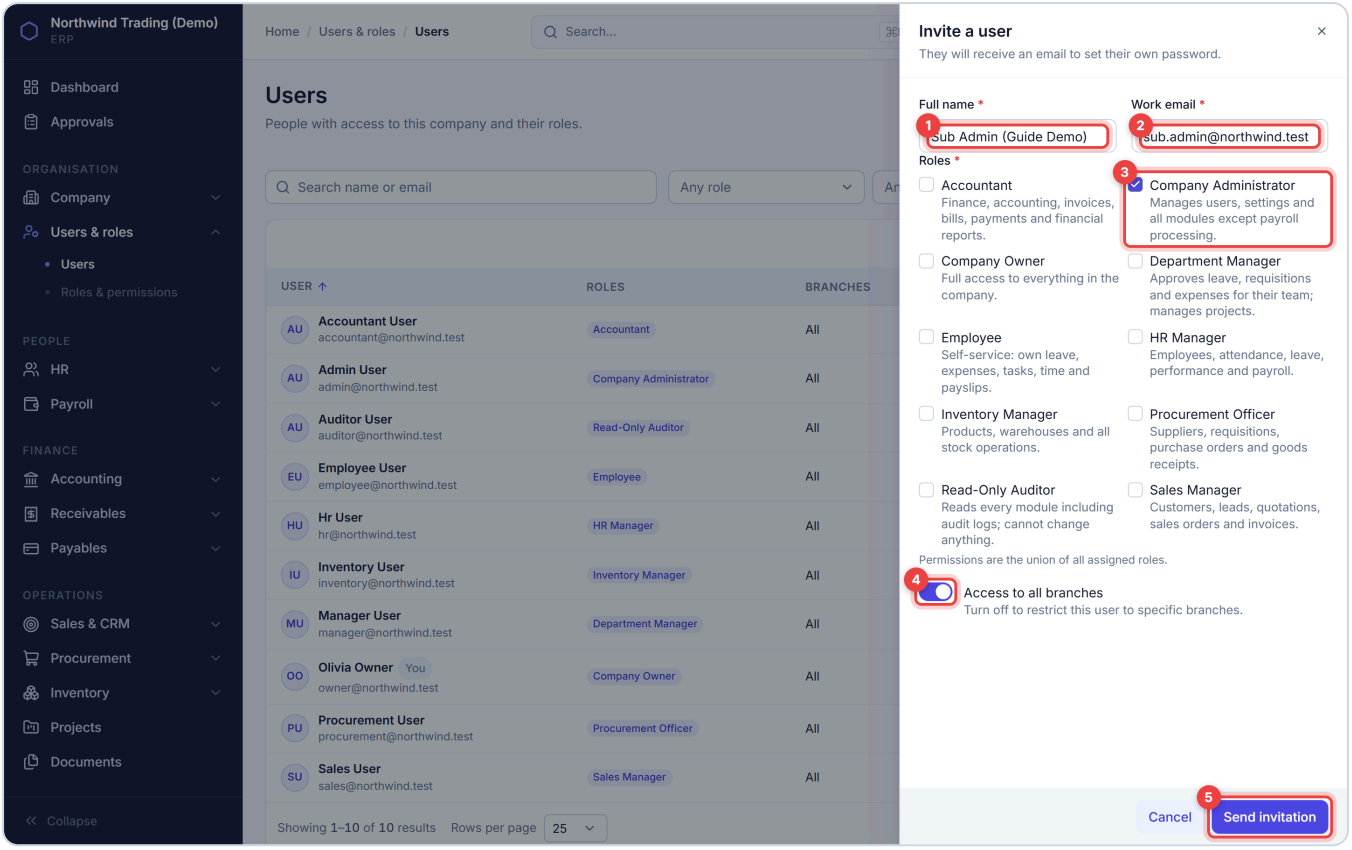

Figure 2 — Invite user: (1) naam, (2) email, (3) **Company Administrator** role, (4) branches, (5) **Send invitation**.

5. Kab Admin rakhein, kab nahi?

Aapki situation	Mashwara
Aap khud rozana sab kuch sambhalte hain	Admin ki zaroorat **nahi** — sirf Owner kaafi hai.
Aap busy hain; koi bharose ka manager rozana kaam, users aur settings sambhale	Usay **Company Admin** bana dein. Payroll aur Owner wali taqat aapke paas rahegi.
Do ya zyada barabar ke maalik (partners)	Dono ko **Company Owner** bana dein. (Ek se zyada Owner ho sakte hain.)
Kisi ko sirf ek kaam dena hai (sirf HR ya sirf accounts)	Admin **mat** banayein — **HR Manager** ya **Accountant** jaisa chhota role dein.

> ⚠ **Dhyan dein**
> Admin ke paas bahut taqat hai — users bana sakta hai, settings badal sakta hai, sab data dekh sakta hai. Ye role sirf **bharose ke shakhs** ko dein, aur Owner aur Admin dono **Settings** → **Security** mein **2FA on** zaroor karein.

6. Aksar puche jane wale sawal

Kya ek company mein do Owner ho sakte hain?

Haan. Owner kisi doosre user ko bhi Company Owner role de sakta hai — partners ke liye ye theek hai.

Admin ne kisi ko ghalat role de diya to?

Owner (ya Admin) **Users** page par us user ke saath **Edit access** se role badal sakta hai. Har tabdeeli **Audit log** mein likhi jaati hai — kis ne, kab, kya badla.

Admin company chhod de to?

Owner **Users** page se uski membership **deactivate** ya **Remove from company** kar de. Foran uska access khatam ho jata hai.

Owner password bhool jaye to?

Login page par **Forgot password?** — Gmail par reset link aayega. Kisi admin ko password batane ki zaroorat nahi.

Kya Admin naya Admin bana sakta hai?

Haan, kyunke Admin ki saari permissions uske apne paas hain. Lekin wo kisi ko **Owner** nahi bana sakta, aur na **payroll chalane** wali permission de sakta hai.

Admin aur Platform Owner mein kya farq hai?

Platform Owner **poore system** ka maalik hai (companies banana/band karna) lekin kisi company ka andar ka data nahi dekhta. Company Owner aur Admin **sirf apni company ke andar** kaam karte hain.

> 🧪 **Khud try karein**
>
> http://localhost:3000 par `owner@northwind.test` aur `admin@northwind.test` (password: `password`) se baari baari login karein. Admin se **Payroll** → **Payroll runs** mein koi run approve karne ki koshish karein — ijazat nahi milegi. (Demo accounts sirf testing ke liye.)
